

2-Week AI Readiness Assessment

Scope and deliverables · Ten business days · Executive-led

A focused diagnostic that answers one question: is your organization ready to capture value from AI, and what is the fastest path to start? Below is exactly what is delivered.

WHAT WE DO, WEEKS 1 AND 2

- **Executive intake and alignment**
Structured sessions with leadership to align on business priorities, AI ambition, constraints, and success measures.
- **Current-state inventory**
Catalogue of existing AI pilots, tools, vendors, investments, data assets, and governance activity already in flight.
- **Six-dimension readiness review**
Evidence-based review across strategy, data, technology, talent, risk and compliance, and change management.
- **Use-case prioritization working session**
Facilitated session to select the 2 to 3 use cases with the strongest value-to-risk ratio and realistic time to impact.

WHAT YOU RECEIVE

- **AI readiness scorecard**
Scored assessment across all six dimensions with strengths, gaps, and the specific conditions required before scaling.
- **Prioritized opportunity backlog**
Ranked use cases with value, risk, feasibility, data dependencies, and estimated effort for each.
- **90-day activation roadmap**
Sequenced plan with named owners, milestones, decision gates, and success measures for the first quarter.
- **Executive readout**
Board-ready presentation and written summary with clear recommended next steps and investment implications.
- **Governance starting framework**
Draft decision rights, review cadence, and risk guardrails your team can adopt immediately.

TIMELINE

- **Days 1 to 3**
Executive intake, document review, and stakeholder interviews scheduled.
- **Days 4 to 8**
Six-dimension review, current-state inventory, and use-case prioritization session.
- **Days 9 to 10**
Scorecard, backlog, and 90-day roadmap finalized, followed by the executive readout.
